Voiceover, clean read

Your best customer keeps making your staff uncomfortable. From the thirtieth of October, that can be on you. Not them. You. If you didn't take all reasonable steps to stop it. The new law says employers must not permit harassment of their staff by third parties. That means customers and clients. A third party is anyone who isn't you or your staff. Customers, clients, suppliers, contractors. And it's not just sexual harassment. It covers harassment linked to things like age, disability, race, religion, sex and sexual orientation. And your staff can bring a claim against you at an employment tribunal. So here's what to do before the thirtieth. One. Put it in writing. A harassment policy that covers customers and clients, not just staff. Two. Make it easy to report. More than one way to speak up, and act fast when someone does. Three. Put it in your client contracts and terms. Set out how your staff must be treated, and what happens if they're not. Four. Train your team and managers on what to do when it happens. Dogetlawyer keeps every client contract in one place, with a task and an owner for each update. So nothing slips before the deadline. Has a customer ever crossed the line with your team? Yes or no. Your best customer isn't

worth your best staff. Dogetlawyer dot com, link in bio.
